

Champion has been dedicated to servicing professionals with industrial grade products and services since 1897. Our product range includes twist drills, end mills, taps, dies, cutters, magnetic drill presses and masonry tools that are engineered for peak performance.

Professional Grade Cutting Tools

As sophisticated as the machines that run them. Material selection, metallurgy and tool geometry are engineered to give you dependable performance and long life.

From screw machine drills to taper shank drills, Champion twist drills are manufactured to exacting standards that yield the lowest cost per hole.

Champion taps will give you close tolerance threads in a variety of applications including both high speed tapping heads and hand use.

Reamers are available in bridge reamers, adjustable hand reamers, chucking reamers and chassis reamers. Use Champion reamers to align, enlarge or debur holes

Heavy Duty Cutting Tools for tough applications.

Includes XL5, XL28, and XL12 twist drills, SA80 reamers, and XL22 spiral point taps.

System for drilling large diameter holes in structural steel.

RotoBrute systems include magnetic drill presses and both high-speed steel and carbide tipped annular cutters.

ProLine includes over 365 sizes of masonry drills and steel chisels for the professional tradesman.

The new CM-MPB multi-purpose bit penetrates steel, concrete, wood and non-ferrous abrasive materials.

For drilling rebar embedded concrete, use ProLine CM95X SDS-Plus "solid-tip" bits.
