Re: Installation of Large Module Tile & Stone with the Tuscan Leveling System & Laticrete

Our Laticrete Technical Service Team has taken a close look at the Tuscan Leveling System. We are pleased to recommend the Tuscan Leveling System to reduce or eliminate lippage and provide "smooth, plumb & true" Installations of Large Module Tile & Stone.

Our recommended Laticrete materials for use with the Tuscan Leveling System include:

*Thinbed & Medium Bed method:*

Laticrete 4237 / 211 Latex Thinset adhesive mortar for thin & medium bed installations

Laticrete 254 Platinum Thinset mortar for thin bed installations

Laticrete 220 Marble & Granite Mortar for thin & medium bed installations

Laticrete 4-XLT for thin & medium bed installations

Laticrete Sure Set Thinset mortar for "no back buttering required" thin bed installations

*Spot Bond Method:*

Latapoxy 310 Epoxy Adhesive for spot bonding large format tile and stone on vertical surfaces

When tile and stone is installed using the Tuscan Leveling System with Laticrete system materials, the installation will be covered with a Laticrete comprehensive labor and materials warranty. For technical support, answers to installation questions and information on how to obtain a full Laticrete system warranty covering replacement of labor and materials contact Laticrete Technical Support: 800.243.4788 ext. 235, or +1.203.393.0010 ext. 235, email [technicalservices@laticrete.com](mailto:technicalservices@laticrete.com) or visit [www.laticrete.com](http://www.laticrete.com).

Sincerely Yours,

Henry B. Rothberg
